

BALtrans moves fragile art exhibition for Louis Vuitton

BALtrans International Moving is the events and exhibitions logistics business of Toll Global Forwarding. The company provides bespoke movement and installation services and recently worked on a challenging project for *Louis Vuitton*.

The luxury designer brand recently launched an exhibition in its flagship Macau store for artist *Zhang Huan*. *Espace Louis Vuitton* is a gallery space within the store exhibiting the latest haute couture from the art world.

The latest installation was that by famous contemporary Chinese painter and artist *Zhang Huan* for his exhibition, "*East wind, West wind*". The installation required the support and specialised logistics expertise of BALtrans.

The highlight of the show, "*Ash Jesus*" and "*Ash Buddha*" pieces required extra special assistance. Both pieces were constructed from ash collected from joss sticks in temples and as such were very fragile.

Although it was challenging to move the sculptures as the ash was very fine and there was a constant risk that it would move, the team handled "*Ash Jesus*" and "*Ash Buddha*" with ultimate care. With a lot of effort and excellent planning, the exhibits arrived in position and fully in tact.

In addition to the ash sculptures, there were leather sculptures, ash paintings and wood carvings. These creative exhibits made the whole exhibition a great success. ❖❖❖
